

The Free and Open Source Electronic Lab Notebook

Summary

- Why use an electronic lab notebook?
- Why use an open source solution?
- Why use eLabFTW?
- Why use Deltablot hosting?

Why use an ELN?

Problem:

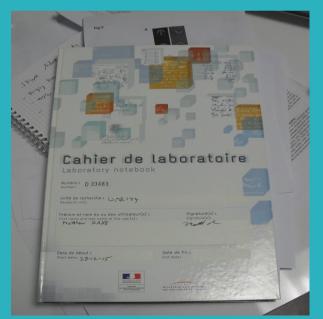

Need to store metadata of experiments (what, when, where, who, why, how)

Why use an ELN?

Problem:

Need to store metadata of experiments (what, when, where, who, why, how)

Solution:

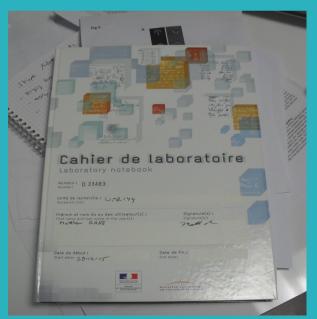

Why use an ELN?

Problem:

Need to store metadata of experiments (what, when, where, who, why, how)

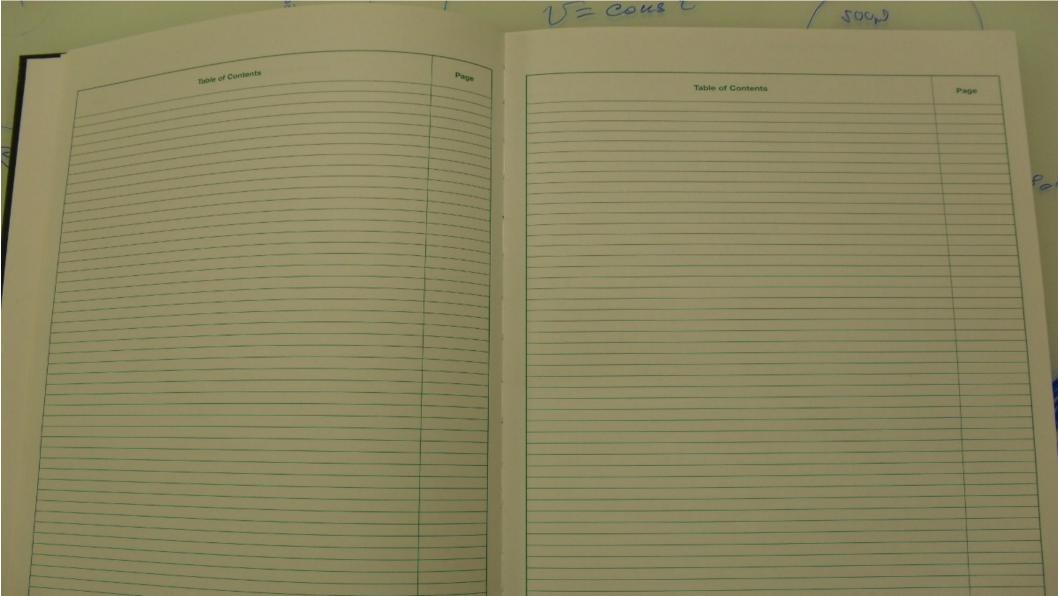

Solution:

Limitations:

- Can be lost or burned
- No backups
- Often empty
- Not readable by others easily
- Can't search for something

Now you want to use an ELN

Problem:

Which one?

"Should we use the free solutions out there?"

"But if it's free, it means we are the product, right?"

"Those privacy policies mention too many times the word "marketing" to my taste"

Now you want to use an ELN

Problem:

Which one?

"But should I give all my research results to a foreign company on which I have no control?"

"What happens if that company gets bought by a Chinese consortium?" "What happens to my data if that company closes"

Now you want to use a free and open source ELN

Problem:

Which one?

Well, eLabFTW of course! It's the most popular one and the most flexible, modern and fast ELN out there!*;)

*source: me

eLabFTW

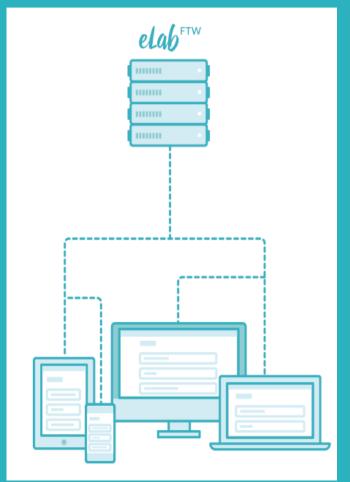

- Developed since 2012
- Free as in beer
- Free as in speech
- 420+ stars on GitHub
- Vibrant users community contributing to the software
- Modern
- Has great features
- Secure
- Popular all over the world

eLabFTW: key features

Web based

No client to install

Responsive design (works with all screen sizes)

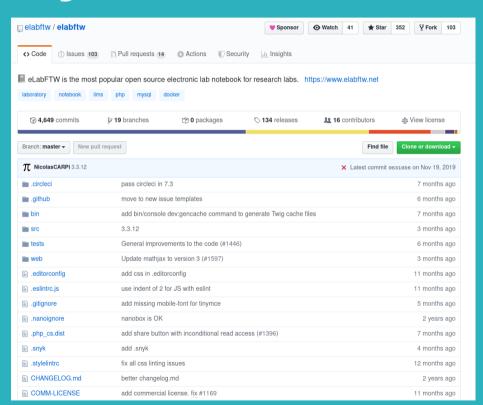

eLabFTW: key features

Open source

Access to the source code is immediate

Users contributions are welcome

A good read: The closed source sustainability crisis

eLabFTW: community driven development

Modification Scheduler feature request #1453 opened on Aug 13 by Benjamin218	
① Show linked database items too in 'show related' link feature request #1432 opened on Jul 31 by Aveyron-RetD	□ 3

eLabFTW: key features

- Trusted timestamping (RFC 3161)
- API access
- SAML authentication
- Templates
- Database for products/protocols
- Export in ZIP, PDF, CSV, JSON
- Molecule editor
- Todolist
- Tex rendering
- Very customizable
- Translated in 17 languages

eLabFTW: key features For research centers/universities

- Host it on your network
- Centralize your results on one server
 - No data gets lost if a laptop of a postdoc is stolen
 - Several teams can be hosted on the same instance

eLabFTW: quality software

- Test suite (unit, acceptance, static analysis)
- Respects code standards
- Best practices followed
- Modern tooling used

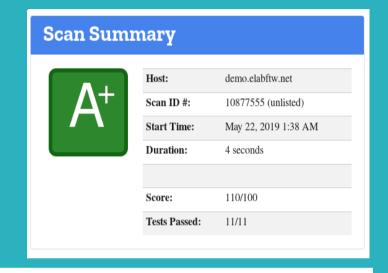

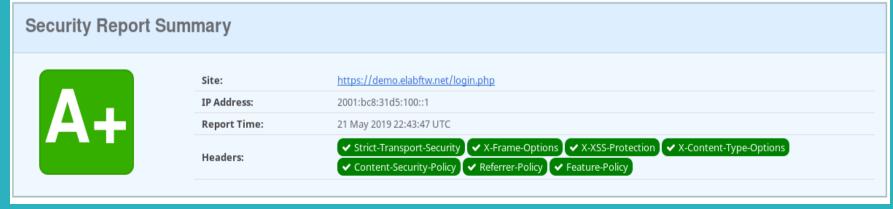

eLabFTW: secure software

- Tight and secure configuration at different levels
- Vulnerability scans
- Signed releases
- Perfect score on Mozilla's Observatory

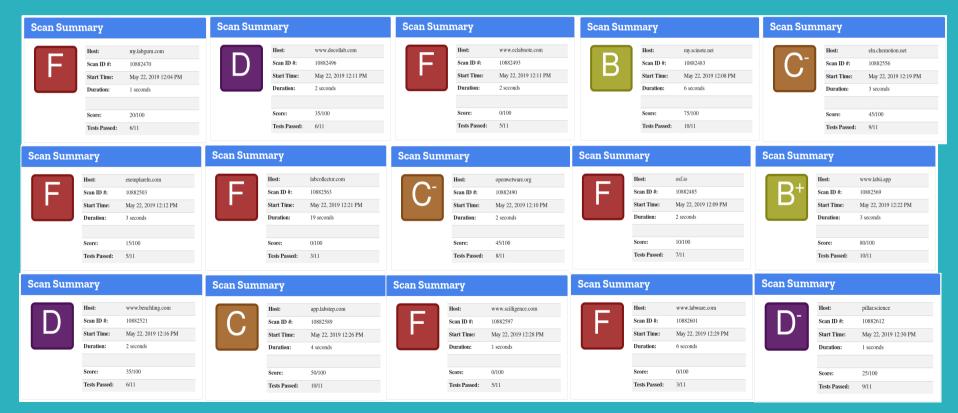

eLabFTW: secure software

eLabFTW: secure software not like others...

eLabFTW: supported software
